

Welcome

Lex Leroy Art
2025

About me,

I was born in the 70's, influenced by the 80's and especially the 90's. An era where almost everything was respected and appreciated in terms of color and style.

I distanced myself from the classical academic approach to art to join the street art movement of the early 90s. I connected with artists from all over the world and participated in many exhibitions and events.

The growing market demand brought street art into galleries. I began to work on canvas, relying on my savoir-faire and expertise, working with galleries, private collectors and public institutions.

In the decades that followed, I successfully explored new areas of art such as graphic design, digital art, digital photography and web design.

My artistic approach is difficult to define, influenced by many,

but equal to none. Abstract, Impressionistic, Surreal, Metaphysical or Transcendental?

I have been living in Tenerife for the last 4 years and my artistic manifestations and expressions resonate with the nature, landscapes, lights and myths of this wonderful island. The Canary Islands definitely take you to another level.

My new art collection that I am creating here seems to be a reminder of what I believe art is all about: „ to create a unique experience, to build coherence, and to push the boundaries of what is possible “.

I am happy to share my new collection of artworks with you and truly invite you to open your heart to this unique experience.

Sincerely yours,

Lex Leroy
